

Total Cable Solutions

19" Black Steel Relay Rack Shelf Options

Product Overview

The TCS is proud to offer a network shelving solution that is made in the USA. Rack mount shelves are designed a great way to store your non-rack mountable components. Common uses are for monitors, modems, DSL routers, tape players, backup units, or almost anything you can think. Each unit is manufactured with durable steel and coated with a scratch resistant polyester powder coat finish. Units are available in four different configurations that fit the most common requirements. Each unit is specifically designed for minimal space requirements.

Features

- Constructed with durable 16 ga. Steel
- 2U rack mounting height
- Include 4 rack screws for mounting
- Durable powder coat black finish
- Front and back flange to ensure your components cannot slide off
- Offer both vented and solid versions
