Fiber Adaptor Plates

Features

Offers complete flexibility in connector style

Made to the LGX Standard Size

Meets all Standards and is compliant with TIA/EIA-568-B

Stable spring helps keep the connector from moving in the metal plate.

New plates will be made for future connector styles, protect investment

The shutters protect from dust entering the adaptor and damaging the glass or creating a bad connection. The shutters also keep harmful laser light from accidentally hitting your eye.

These plates are designed to fit perfectly into all of Total Cable Solutions wall mount and rack mount fiber patch panels.

All single-mode adaptors use Phosphor bronze sleeves/ferrols, and all multmode adaptors use Zirconia ceramic sleeves/ferrols

Exclusively use Suncall LC and SC adaptors for superior performance

Push/ pull fasteners allow tool-less quick installation or changes

Specifications

Dimensions: 5.12"L x 1.20"H

Material: (Panel) .064" Steel Coating: Electrostatic polyester powder coat paint

Made in the USA
